

OUR ECO-RESPONSIBILITY CHARTER

Commitment 1 : Reduce and Share Transportation

Limit travel by grouping appointments, encouraging carpooling, and optimizing logistics across the thirteen municipalities hosting the festival.

Commitment 2 : Adopt Eco-Friendly Communication

Prioritize digital communication, reduce paper printing, and use sustainable and reusable materials (signage, documentation, posters) whenever possible.

Commitment 3 : Raise Awareness

Highlight films and content addressing environmental issues (identified with the “Eco-Responsible” label). Organize workshops and thematic events to help raise awareness among both audiences and professionals.

Commitment 4 : Promote Short Supply Chains

Support the local economy by showcasing local food stands and service providers, thereby reducing the environmental impact linked to product transportation.

Commitment 5 : Consume Responsibly

Choose local and responsible suppliers for catering, services, and equipment. Reduce energy consumption by using energy-efficient lighting and projection solutions.

Commitment 6 : Evaluate and Improve Our Actions

Assess the festival’s environmental initiatives and identify new opportunities for improvement.
